SPORTS MEDICINE
Hamilton

Sports Medicine Clinic

Hamilton College opened its newly renovated Athletic Training Clinic for the start of the fall 2006 season. It is located on the south end of Bundy Scott Fieldhouse, and is recognized by the large glass atrium near the athletic bus drop-off circle. The space was previously occupied by the fitness center.

There will be an area near the visiting locker rooms for treatments and taping. Ice, water, hot packs, and taping/treatment tables will be provided. If any of your athletes need additional modalities, please accompany them to the athletic training clinic.

Please call us in advance if any team is not traveling with a Certified Athletic Trainer. We will be happy to provide pre-game taping and treatments. **We ask that your team brings a well-stocked kit and any special instructions from your staff.**

VENUE SET-UP

Each venue will have ice, water, water bottles and appropriate emergency equipment on site.
